

Comprehensive FDD Screening Services

GenHunter can assist you with the most accurate and comprehensive gene expression profiling available, unmatched by microarray. With our in-house automated comprehensive FDD Services (see below: shows 24 out of 216 possible primer combinations), we are confident that your investment in our FDD services will be rewarded with the discovery of genes of real interest to your project. By letting GenHunter do all the work, customers can focus on the biology of the system under investigation and enjoy peace of mind. Reproducibility guaranteed.

Automated FDD Comprehensive Screening (Digital image in grayscale)

Four RNA samples (before, and 6, 9, and 12 hours after a drug treatment) were compared with 1 anchor primer in combination with 24 arbitrary primers. These samples were then run on our massive 132-lane Horizontal Electrophoresis System.
